

# Meet Webster Griffin Tarpley – One of the Great Minds of Our Time

9/11 Synthetic Terror: Made in USA. 512 pages, \$17.95, 4th ed. April 2007. ISBN 0-930852-370.

Many authors have posed questions about 9/11, but Tarpley gives us answers too. He shows how the 9/11 plot was executed by a rogue network of well-placed moles, patsies, and professional killer cells, operating in privatized paramilitary settings, and covered by corrupt politicians and corporate media. The simplistic Big Lie – that “it’s paranoid to think ‘our own government’ is smart enough to do it” – is exploded. *Only* state actors have the resources for spectacular terrorism, says Tarpley.

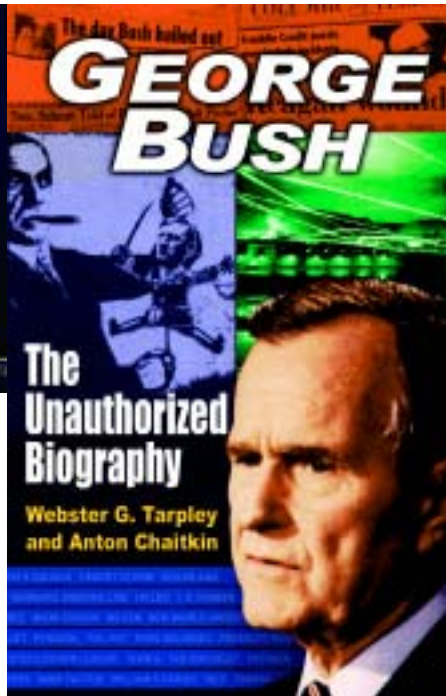

*“The strongest approach to truth... strongest of the 770+ books I have reviewed here at Amazon... without question, the most important modern reference on state-sponsored terrorism.” – Robert Steele, ex-CIA officer, founder of Marine Intelligence, #1 non-fiction reviewer on Amazon.com.*

Webster G. Tarpley is a humanist political philosopher, anti-terrorism expert and activist, talk show host, brilliant and popular lecturer, linguist, Princeton Phi Beta Kappa summa cum laude, Fulbright scholar, and leading authority on the Anglo-American empire. In 1978, his first book unmasked the murder of Italian prime minister Aldo Moro by “Red Brigades” as a false-flag operation run by fascist elites and steered by the US and NATO.

His groundbreaking classic exposé of the Bush dynasty, *The Unauthorized Biography*, brought down Pres. Bush Sr., as featured in the classic film on the 1992 election, *The War Room*. A 700-page blockbuster of research, cited by all that followed, yet never matched, it exhaustively documents how the Bushes and their Skull & Bones brethren made fortunes on financing Hitler, the Nazi war machine, and slave labor in the death camps. Bush Sr. is linked to Iran-Contra, Watergate, the attempt on Reagan’s life when Bush was VP, “eugenics” programs, genocides in poor nations, the LBO looting, and war crimes in Iraq.

*George Bush: The Unauthorized Biography, 2006 reprint, ISBN 0-930852-923. 704 pages, 19.95.*

Bush Bio: Over 30,000 copies sold

“By far the best exposé of the rich, powerful families and their networks, which pervade the entire spectrum of government, intelligence, corporations... Timeless and timely... the cold, hard facts... boggles the mind... exacting, painstaking research ... Absolutely a must-read.” – S. Felton.

“The Hitler Project” is the most explosive chapter of the Bush Bio. In *The Nazi Hydra in America: Suppressed History of a Century*, author Glen Yeadon and researcher John Hawkins follow that lead to mine a rich vein of evidence, overturning deep-set taboos and the selective, accepted view of America as bulwark of democracy. *The Nazi Hydra* documents in fascinating detail how US plutocrats helped fascism come to power in Europe, and are subverting America since the war. Release Fall 2007, 672 pages, \$19.95. “Great source of background information on the current gang that run today’s world.” — free-thinkers.org.
